LIST OF TABLES

FOREWORD

SECTION 1 INTRODUCTION

1.1 History of Asphalt Emulsion	1-1
1.2 Future of Asphalt Emulsion	1-3

SECTION 2 CHEMISTRY

2.1 Composition of Asphalt Emulsions	2-1
2.2 Asphalt Emulsion Classification	2-1
2.3 Variables Affecting Quality and Performance	2-4
2.4 Emulsion Ingredients	2-4
2.4.1 Asphalt	2-4
2.4.2 Water	2-5
2.4.3 Emulsifying Agents	2-5
2.5 Producing the Emulsion	2-8
2.5.1 Emulsifying Equipment	2-8
2.5.2 The Emulsifying Process	2-8
2.6 Breaking and Curing	2-9
2.6.1 Breaking	2-9
2.6.2 Curing	2-10
2.6.3 Factors Affecting Breaking and Curing	2-11

SECTION 3 STORING, HANDLING AND SAMPLING

3.1 Storing Asphalt Emulsions	3-1
3.2 Handling Emulsified Asphalts	3-2
3.3 Possible Causes of Contamination of Asphalt Material or Samples and Suggested Precautions	3-3
3.4 Sampling Asphalt Emulsions	3-5
3.4.1 Sampling Precautions	3-6
3.4.2 Safety Precautions	3-6
3.4.3 Protection and Preservation of Samples	3-6

SECTION 4 TESTING

4.1 Asphalt Emulsion Tests	4-1
4.1.1 Particle Charge Test.....	4-3
4.1.2 Emulsion Viscosity	4-3
4.1.3 Demulsibility	4-4
4.1.4 Identification Test for Cationic Rapid-Setting Emulsion	4-4
4.1.5 Identification of Cationic Slow-Set Emulsions	4-4
4.1.6 Settlement and Storage Stability Tests	4-4
4.1.7 Cement Mixing	4-5
4.1.8 Sieve Test.....	4-5
4.1.9 Coating Ability and Water Resistance	4-5
4.1.10 Field Coating Test	4-6
4.1.11 Unit Weight of Asphalt Emulsion	4-6
4.1.12 Residue and Oil Distillate by Distillation	4-7
4.1.13 Residue by Evaporation	4-7
4.2 Examination of Residue	4-7
4.3 Additional Emulsion and Residue Tests.....	4-8
4.3.1 Breaking Index	4-8
4.3.2 Vialit Test	4-9
4.3.3 Zeta Potential	4-9
4.3.4 Elastic Recovery after Ductility	4-9
4.3.5 Force Ductility.....	4-9
4.3.6 Ring and Ball Softening Point.....	4-9
4.3.7 Tensile Strength (Stress)	4-10
4.3.8 Torsional Recovery.....	4-10
4.3.9 Toughness and Tenacity	4-10

SECTION 5 SELECTING THE RIGHT TYPE AND GRADE

5.1 General Emulsion Uses	5-1
5.1.1 Rapid-Setting Emulsions	5-1
5.1.2 Medium-Setting Emulsions.....	5-2
5.1.3 Slow-Setting Emulsions	5-3
5.1.4 Quick-Setting and Micro-Surfacing Emulsions.....	5-3
5.2 Guidelines for Successful Performance.....	5-4

SECTION 6 SURFACE TREATMENTS

6.1 Uses of Surface Treatments	6-1
6.2 Surface Treatment Materials	6-2
6.2.1 Asphalt Emulsion	6-2
6.2.2 Aggregate.....	6-3

Paragraph Number		Page Number
6.3 Types of Treatments and Seals	6-6	
6.3.1 Single Surface Treatment.	6-6	
6.3.2 Multiple Surface Treatments.	6-7	
6.3.3 Cape Seal.	6-10	
6.3.3.1 Design of Cape Seal.	6-10	
6.3.4 Sandwich Seal	6-11	
6.3.5 Sand Seal.	6-11	
6.3.6 Slurry Seal	6-12	
6.3.7 Micro-Surfacing	6-17	
6.3.8 Seal Coat	6-21	
6.3.9 Fog Seal.	6-22	
6.4 Surface Treatment Construction	6-22	
6.4.1 The Asphalt Distributor.	6-22	
6.4.2 Aggregate Spreader.	6-25	
6.4.3 Rollers	6-29	
6.4.4 Power Broom	6-30	
6.4.5 Trucks.	6-30	
6.4.6 Sequence of Operations.	6-31	
6.4.7 Precautions.	6-32	
6.4.8 Checking Application Rate	6-32	
6.5 Surface Treatment Safeguards	6-33	
6.5.1 Streaking	6-33	
6.5.2 Bleeding (Flushing).	6-34	

SECTION 7 AGGREGATE MIXES

7.1 Asphalt Emulsion Mixtures.	7-1
7.2 Mixture Design.	7-2
7.3 Aggregates.	7-2
7.4 Additives.	7-3
7.5 Production of Emulsion Aggregate Mixtures	7-4
7.6 Mixed-in-Place Production	7-5
7.6.1 Application Rates	7-5
7.6.2 Rotary/Reclaimer Mixing	7-7
7.6.3 Travel Plants.	7-8
7.6.4 Blade Mixing.	7-9
7.6.5 Spreading and Compacting	7-10
7.7 Emulsion Plant Mix (Cold)	7-10
7.7.1 Laydown and Compaction	7-12
7.7.2 Precautions.	7-13
7.7.3 Seal Coat	7-13
7.8 Emulsion Plant Mix (Warm and Hot)	7-14
7.8.1 Materials.	7-14

Paragraph Number		Page Number
7.8.2 Mixing Plants		7-14
7.8.3 Mixing and Temperatures		7-14
7.8.4 Construction Methods		7-14
7.9 Maintenance Mixtures		7-15
7.9.1 Immediate Use Maintenance Mixes		7-15
7.9.2 Stockpile Maintenance Mixes		7-16
7.9.3 Maintenance Mixes Using RAP		7-17

SECTION 8 MISCELLANEOUS APPLICATIONS

8.1 Tack Coat	8-1
8.2 Mulch Treatment	8-3
8.2.1 Asphalt Emulsion Spray Mulch	8-3
8.2.2 Asphalt Emulsion Mulch Tie-Down	8-3
8.3 Crack Sealing	8-5
8.4 Prime Coat	8-7
8.5 Dust Palliative	8-8
8.6 Repair of Potholes	8-9

SECTION 9 ASPHALT PAVEMENT RECYCLING

9.1 Types of Recycling	9-1
9.2 Candidates for Recycling	9-2
9.3 Advantages	9-4
9.4 Cold Recycling	9-5
9.4.1 Plant Mixed	9-5
9.4.2 Mixed In-Place	9-7
9.5 Full-Depth Reclamation	9-8

SECTION 10 MIX DESIGN METHODS

10.1 Dense-Graded Aggregate Mix Design	10-1
10.1.1 Aggregates	10-1
10.1.2 Asphalt Emulsions	10-1
10.1.3 Determination of Trial Emulsion Content	10-2
10.1.4 Base Mixtures	10-2
10.1.5 Surface Mixtures	10-2
10.1.6 Coating and Adhesion Testing	10-2
10.1.6.1 Coating Testing Procedure	10-3
10.1.6.2 Adhesion Testing Procedure	10-3
10.1.7 Preparation of Test Specimens	10-3
10.1.7.1 Mixing Procedure	10-4
10.1.7.2 Compaction Procedure	10-4
10.1.8 Testing of Compacted Specimens	10-5

Paragraph Number		Page Number
10.1.8.1 Volumetrics		10-5
10.1.8.2 Stability Testing		10-5
10.2 Open-Graded Aggregate Mix Design		10-6
10.2.1 Preparation of Mixtures		10-6
10.2.2 Testing Procedures		10-6
10.2.3 Optimum Emulsion Content Determination		10-8
10.2.4 Final Results		10-8

Appendix A GLOSSARY

A.1 Aggregate	A-1
A.2 Asphalt.	A-1
A.3 Asphalt Emulsion.	A-1
A.4 Equipment	A-2
A.5 Types of Asphalt Surface Treatments and Mixes	A-3
